

Application Form for the 2019 MSCA-IF Masterclass at TUM

In response to the [European Commission's \(EC\) call for application](#) for "Marie Skłodowska Curie Individual Fellowships 2019" and TUM's efforts to recruit and train excellent international young scientists, the TUM Talent Factory offers to Postdocs a 3-day MSCA-IF Masterclass in order to enhance their ongoing MSCA-IF proposals. The target group are international Postdocs who are planning a research stay at TUM or want to prolong their stay at our institution.

Researchers do not need to be affiliated with TUM beforehand, but require a TUM host professor willing to support their applications. They also need to fulfill the eligibility criteria (MSCA Mobility Rule, PhD or 4 years of full-time research experience).

During the **3-Day Writing Camp** (August 12-14, 2019), the participants will work individually and in groups on their proposals, supervised by specialized trainers. These trainers will give multi-stage feedback on every single proposal.

To give applicants who are not in Munich the possibility to participate, **Travel Grants** will be awarded to up to five applicants.

The workshop will be in English. Researchers can apply until **June 26 2019**, by filling the form. The participants selected for the Writing Camp will be informed until June 28, 2019. The deadline to submit your proposal is September 11, 2019.
