Compatible Bachelor's Programs

Please note that the COME master's program requires a strong background in engineering, structural and/or applied mechanics!. Therefore we require good grades in the fields mechanics, dynamics and mathematics. Furthermore you should have attended at least one programing course (e.g. C/C++).

Eligibility for the Master’s Program in Computational Mechanics is demonstrated by the following degrees:

- Civil engineering
- Mechanical Engineering

In general, eligibility for the Master’s Program can be also demonstrated by comparable degrees such as

- Aerospace Engineering
- Applied or Structural Mechanics
- Structural Engineering
- Engineering Mechanics
- Mechanical Engineering and Automation
- Mechatronics Engineering
- Naval Architecture
- Marine Engineering
- Automotive Engineering
- Mechanical Engineering and Production

Please note that applications with a degree from the following fields, will be rejected.

- Informatics
- Information Technology
- Electrical Engineering
- Communication Engineering
- Chemical Engineering
